EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee. The application has been amended as follows:

- Replace claim 1 with the following version:

1. An apparatus, comprising;

an optically transparent member, the optically transparent member having:

an input configured to receive light; and

one or more facets formed in the optically transparent member, the one or more facets being configured to reflect light received at the input of the optically transparent member, the reflected light creating a lamina of light adjacent the optically transparent member,

wherein the one or more facets have an optically reflective surface, and

wherein the one or more facets have a surface that extends from the optically reflective surface to a light emitting surface on the optically transparent member, the height of the surface varying to reduce the amount of light blocked by first facet and received by a subsequent facet.

- Cancel claim 2.

Art Unit: 2874

- Replace claim 20 with the following version:

20. The apparatus of claim 19, wherein the predetermined angle ranges from zero to any angle within the TIR range of the material used to make the optically transparent member.

- Replace claim 22 with the following version:

22. The apparatus of claim 1, wherein the reflective surfaces of the one or more facets each have a different depth.

- Replace claim 28 with the following version:

28. The apparatus of claim 1, wherein the optically reflective surface of the one or more facets has one of the following shapes: flat, converging, or diverging.

- Replace claim 34 with the following version:

34. The apparatus of claim 1, wherein the optically reflective surface of the one or more facets are micro-mirrors.

Explanation: Applicant's amendment to claim 1 added the limitations of original claim 23, which was identified in the last Office action as containing allowable subject matter. However, the amendment did not include the subject matter of claim 2, from which original claim 23 also depended. This subject matter is important because it provides antecedent basis for "the optically reflective surface". Therefore, the examiner has amended claim 1 to incorporate the subject matter of original claim 2. Claim 2 has been canceled accordingly, and claims 22, 28,

Art Unit: 2874

and 34 have been amended to depend from claim 1 instead of claim 2. Claim 20 has been amended to delete the unnecessary "a" between "to" and "any". These changes merely improve the clarity of the affected claims and are believed to be obvious in nature.

Allowable Subject Matter

Claims 1, 3-9, 11-22, and 24-40 are allowed. Their allowability is believed to be clearly established from the application history and no further comment by the examiner is considered necessary.
